

Checklist: How to Create an NFT

- 1. Select a Blockchain**
 - Choose a blockchain to mint your NFTs.
 - **Common Options**: Ethereum (popular for smart contracts), Flow, Binance Smart Chain.
- 2. Set Up a Digital Wallet**
 - Create or link a wallet that supports the chosen blockchain.
 - **Example Wallets**: MetaMask, Trust Wallet, etc.
 - Ensure you have the required cryptocurrency (e.g., Ethereum) to cover transaction costs.
- 3. Choose an NFT Marketplace**
 - Select a marketplace to create and sell your NFT.
 - **Examples**: OpenSea, Rarible, Foundation.
- 4. Mint the NFT**
 - Upload the digital file (art, animation, etc.) you want to tokenize.
 - Fill in the details:
 - **Title**: Name your NFT.
 - **Description**: Describe your artwork.
 - **Royalties**: Set royalties for future resales.
- 5. Finalize and Create**
 - Click "Create" or "Mint" to officially add your NFT to the blockchain.
- 6. List for Sale**
 - If desired, list your NFT on the marketplace for potential buyers to discover.
